NO NUKES!! NO MORE!! NO WAY!!

The US government is threatening to resume full scale nuclear weapons testing at the Nevada Test Site and begin high level nuclear waste dumping at Yucca Mountain. These areas are within the Western Shoshone country of Newe Sogobia.

This October marks the 10th anniversary of the U.S. full-scale nuclear testing moratorium and the last major Nevada event that brought thousands of people from around the world to demand an end to nuclear testing. International activists are already hard at work beginning the mobilization of thousands of people to return to the beautiful Great Basin Desert to celebrate and reinvigorate the movement for nuclear abolition.

WISHOUP

October 5th, 2002, People's Nuclear Abolition Summit, Las Vegas, Speakers from tribal, environmental and anti-nuclear organizations will educate and inspire. Food and celebration.

PISEQUIA

October 6th - 10th, Family Spirit Walk for Mother Earth. " Walking in wellness so that our children will follow", 65 miles from Las Vegas to Peace Camp at the Nevada Test Site, commemorates the ten-year anniversary of the Walk Across America For Mother Earth and the U.S. moratorium on full-scale nuclear testing at the Nevada Test Site.

This international group of walkers will be continuing a prayer that was started ten years ago. Our effort is for a positive change in the direction of U.S nuclear weapons policies. The Walk honors all those that suffer (past, present, and future) from the inter-generational effects of nuclear weapons testing and use.

The Family Spirit Walk begins with a Base Camp at Chimayo, (near Los Alamos) for three days on August 6. We will be leaving Los Alamos, New Mexico on the anniversary of the bombings of Hiroshima and Nagasaki. The walk will arrive in Las Vegas October 3rd. For more information call 1-800-471-4737.
