

# 9/11: BUSH KNEW

Two years have passed since airplanes crashed into the World Trade Center in NYC and the Pentagon. In that time, the Bush administration has blocked any serious effort to investigate what really happened that day and who did it. Why? Because Bush doesn't want us to know the truth: that he and his cronies knew about the attacks beforehand and let (or helped) them happen so they could declare endless war on the world. Thousands of people have died in this war, and the U.S. is occupying countries with no connection to 9/11, which is costing billions of dollars and many lives.

## **SOME QUESTIONS BUSH DOESN'T WANT ANSWERED:**

- ♦ Why weren't fighter jets scrambled in time to intercept the "hijacked" planes?
- ♦ How could airline fuel, which burns at about the same temperature as kerosene, melt steel girders and make a building collapse? (Hint: it can't. Can you say "controlled demolition"?)
- ♦ Why was the wreckage of the World Trade Center carried away before a standard investigation could happen?
- ♦ Bush has claimed twice that he watched the *first* plane crash into the WTC on a television. How could that be when no ordinary station was broadcasting yet?
- ♦ What are the business connections between the Bush family and the bin Laden family? (In 1979, a member of the bin Ladens invested in George W.'s oil company, Arbusto. The coziness didn't stop then.)

## **U.S. presidential administrations have a long history of faking disasters or letting them happen in order to start wars:**

**1898 - Spanish-American War:** U.S. ship *Maine* sunk in harbor of Havana, Cuba. Blamed on Spaniards and used to start war that netted the Philippines and other colonial possessions for the U.S. Now we know it was either an accident or sabotage by U.S. interests.

**1941 - World War II:** Roosevelt knew about the impending Pearl Harbor attack weeks ahead of time. Certain ships were moved out, but other left as sitting ducks. Former British Prime Minister Winston Churchill is among the people who have revealed this.

**1966 - Gulf of Tonkin incident:** Vietnamese allegedly attack a U.S. ship in their coastal waters. Johnson administration uses this as an excuse to get war powers from Congress. The incident later turns out to have been made up.

**1990 - First Gulf War:** A Kuwaiti woman testifies to the U.S. Congress that she saw Saddam Hussein's soldiers take babies out of their incubators and let them die on the cold floor. Millions of TV viewers become enraged and Bush quotes her frequently to support Gulf War. However, *60 Minutes* and other sources later reveal that the woman was the daughter of the Kuwaiti ambassador, was hired by a PR firm to testify, and that her stories were lies.

**The issue of Sept. 11 is not about Democrats or Republicans, or right or left; it is an issue of TRUTH. Educate yourself! Don't just believe this flyer! Go learn more on your own!**
