THE MIAMI MODEL

Free Trade Police State

(11) www.indymedia.org

This film documents the protests and police state built up in Miami around the Nov. 2003 FTAA Ministerial. Many Cascadians headed down there to be in the streets, and they met up with thousands of folks from around the hemisphere to all be part of the catastrophe that has constantly encircled this free trade agreement.

This film is simultaneously gut-wrenching and uplifting, there is amazing resistance and equally amazing repression. The fight against the FTAA is ongoing, but we are winning.
